Sir,

The Ministry of New and Renewable energy has issued a letter to all Secretaries of Govt. of India to do with plastic folders stating that plastic is a non-biodegradable substance and its improper disposal causes many problems. Plastics are synthetic substances produced by chemical reactions. Almost all plastics are made from petroleum. The monomers of petrochemical plastics are inorganic materials (such as styrene) and are not biodegradable.

2. Khadi & Village Industries Commission (KVIC) patronises Rural traditional Village Industries and Handmade paper is one of the prime village industries under the purview of KVIC. Handmade paper has been globally acclaimed as "eco-friendly" product for its non-toxic, biodegradable properties since it does not use wood pulp as raw material. KVIC propagates usage of Handmade paper to safe guard the ecological balance of the mother earth.

3. The plastic folders which are conventionally being used for meetings and workshops can be very well replaced by the Handmade paper folders which are more durable as well as aesthetic in look. The handmade paper production is undertaken by the rural artisans whose livelihood depends on this trade. Usage of Handmade paper would be a befitting philanthropic deed to uplift the living standards of these artisans as well as follow up action for the Prime Minister's call "Make in India".

4. I therefore request you to advise your office and all offices working under your jurisdiction to make use of handmade paper folders and other stationeries to contribute towards safeguarding the ecological balance of the earth.

5. The Directorate of Handmade Paper & Fibre Industry, KVIC may be contacted (Phone No.26710526) on the above mentioned address.

Thanking you,

Yours faithfully,

Chief Executive Officer
